

Combining Phononic's actively-cooled chilled and frozen totes with GreyOrange's AMR-based Goods-to-Person solutions, you can store temperature-controlled goods up to 30 feet high without controlling the environment of your entire facility.

The comprehensive cooling solution that scales with your facilities' needs

Phononic's actively-cooled connected freezer and refrigerator totes provide the perfect temperature to maintain frozen and refrigerated goods. Combined with GreyOrange, you can store temperature-controlled goods without needing to control the environment of your entire facility.

ACT 2000™

Strong ROI
