

Enable tri-temp order fulfillment in one ambient environment with a solution that reduces capital expenditure by leveraging only 15 standard components – reducing installation time and complexity.

The comprehensive cooling solution that scales with your facilities' needs

The e.Scala's advantage is in its simplicity and value proposition – filling customer's automation needs by fitting neatly in between the density of cube-based solutions and the speed and cost of traditional shuttle-based solutions. The e.Scala and Phononic tote combination lowers the barrier to adoption and presents a fast payback for customers looking to maximize their modernization budget.

ACT 2000™

Strong ROI

Unsurpassed sustainability

Versatile

Scalable

Real-time insights

Compressor-free

Demand-based energy savings

Improved customer experience
