

KPI's warehouse operations design expertise and Phononic's Actively-Cooled Tote technology combine to develop and integrate scalable solutions to maintain cold chain integrity and traceability through all phases of the distribution process.

The comprehensive cooling solution that scales with your facilities' needs

Phononic's actively-cooled freezer and refrigerator totes provide the perfect temperature to maintain frozen and refrigerated goods. KPI's

Tote-to-person picking solutions allow you to store temperature-controlled goods without needing to control the environment of your entire facility.

Strong ROI

Real-time insights

Unsurpassed sustainability

Scalable

Demand-based energy savings

Compressor-free
