

NanoFulfillment's uniquely redeployable, scalable and cost-effective retail fulfillment solution, the NanoFC™, combined with Phononic's ACS™ platform, provides a seamless application for tri-temperature fulfillment automation at this scale.

The comprehensive cooling solution that scales with your facilities' needs

Phononic's actively-cooled freezer and refrigerator totes provide the perfect temperature to maintain frozen and refrigerated goods. NanoFulfillment's tote-to-person automated

picking solutions improves throughput and accuracy, outperforming manual methods. Enjoy top-tier performance without the hefty enterprise-level investment.

Strong ROI

Real-time insights

Unsurpassed sustainability

Scalable

Demand-based energy savings

Improved customer experience
