

Vidir's Powered Carousel for tri-temp automated storage and order retrieval, combined with Phononic's ACS™ platform, provides a technical and efficient back-end solution for online order fulfillment.

The first automated BOPOS fulfillment & staging solution for tri-temperature orders.

Phononic's actively-cooled freezer and refrigerator totes provide the perfect temperature to maintain frozen and refrigerated goods. Vidir's vertical storage solution scales with your business and maximizes utilization of floor space—providing a high-density staging system that reduces the number of touches needed to fulfill an order for curbside or delivery.

Strong ROI

Scalable

Unsurpassed sustainability

Save space and time

Demand-based energy savings

Improved customer experience
